

Painter Job Description

- Need a little experience in setting up sprayers and mixing paint. Most of our painting is applying red oxide primer to steel.
- Ability to operate cranes or at least be able to quickly learn.
- Be able to get up on flat bed trailers to position steel members that the crane operator is loading.
- They will have to wear a respirator, which will need to be fitted.
- And they will also have to go to our doctor to see if the respirator fits them securely.
- Must be physically fit and trainable.

We will need to interview them.
